Rename Column

The screenshot illustrates the process of renaming a column in a Microsoft Excel table. A context menu is open over the 'Region' column header, with the 'Rename' option selected. A black arrow points from the 'Rename' option in the menu to the 'Region' column header. Another black arrow points from the 'Region' column header to the 'Probability' column header. The table data is as follows:

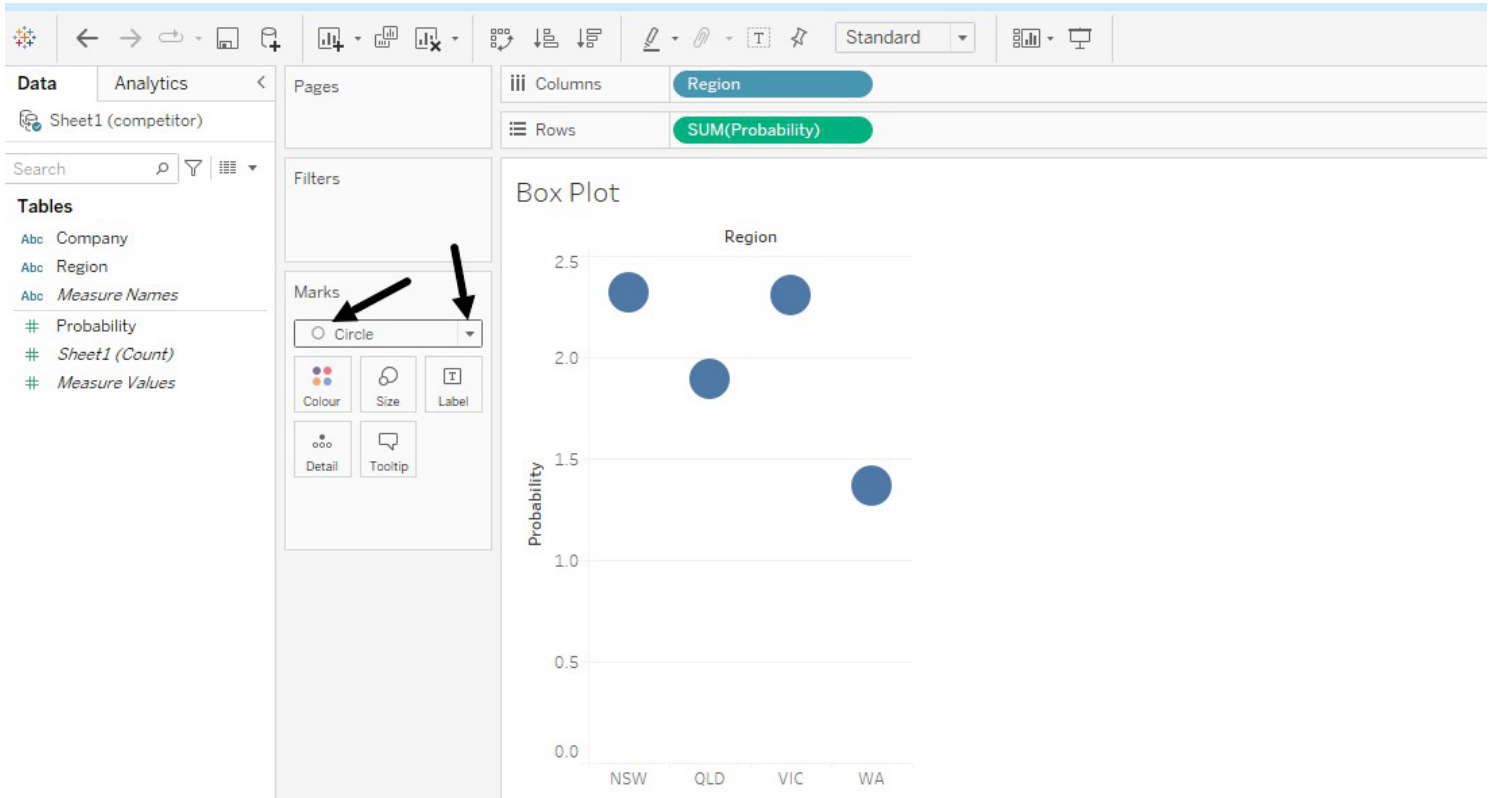

Company	Region	Probability
Competitor 1	NSW	0.085400
Competitor 1	QLD	0.045700
Competitor 1	VIC	0.079000
Competitor 1	WA	0.041800

The interface includes a sidebar with 'competitor' and 'Microsoft Excel' tabs, a 'Sheets' pane with 'Sheet1', and a 'Table Details' pane. A 'Sheet1' dropdown menu is visible above the table. A '3 fields' label is present near the table. A 'Describe...' option is visible in the context menu. A 'Learn more' link is present in the background text.
