Calculated + Map (IF + SUM)

The screenshot displays a data visualization interface with a map of Africa. The map is titled 'Sheet 15' and shows data points colored by 'Profit Group'. The 'Columns' shelf contains 'Longitude (generated)' and the 'Rows' shelf contains 'Latitude (generated)'. The 'Tables' list on the left includes 'SalesData (African Mobil...)' and 'Sheet1 (competitor)'. The 'Marks' shelf is set to 'Automatic' and includes 'Country' and 'City'. A dialog box for 'Profit Group' is open, showing the following formula:

```
IF SUM([Profit]) < 0 THEN "Negative"
ELSEIF SUM([Profit]) < 200 THEN 'Less than 200'
ELSE
    'More than 200'
END
```

The dialog box also includes a message 'The calculation is valid.' and buttons for 'Apply' and 'OK'. Arrows indicate the flow of data from the 'Tables' list to the 'Marks' shelf and then to the 'Profit Group' dialog box.
