

Total Participation - Create Calculated Field

The screenshot illustrates the process of creating a calculated field in Tableau. On the left, the 'Tables' pane lists various data sources, with 'Total Participation' highlighted in green. An arrow points from this field to the 'Marks' card in the center, which is currently set to 'Automatic'. Another arrow points from the 'Marks' card to a dialog box titled 'Total Participation'. This dialog box contains the formula $[Boys\ Participation] + [Girls\ Participation]$. A third arrow points from the 'Apply' button in the dialog box to the 'Total Participation' field in the 'Tables' pane. The dialog box also displays the message 'The calculation is valid.' and includes 'Apply' and 'OK' buttons.

Year-i 'Date' tipinə çevirmək

The screenshot displays a data visualization tool interface with the following components:

- Data Panel (Left):** Shows a table named "Participation Data (partc...". The "Tables" section lists "Sport", "State", and "Year". The "Year" table is selected, and a context menu is open, showing options: "Number (decimal)", "Number (whole)", "Date & Time", "Date", "String", "Default", "Geographic Role", and "Image Role". The "Date" option is highlighted.
- Columns and Rows (Top Right):** Shows "Columns" and "Rows" sections, both currently empty.
- Filters (Middle Left):** A section for adding filters, currently empty.
- Marks (Middle Left):** A section for adding marks, currently empty.
- Chart Area (Right):** A large area titled "Bump Chart" with a grid. It contains three "Drop field here" prompts.

The "Date" option in the context menu is highlighted, indicating the next step in the process of changing the data type of the "Year" field to "Date".

Year-i 'Convert to Continuous' etmək

The screenshot shows the Tableau Desktop interface. On the left, the 'Data' pane displays a list of tables under the 'Participation Data (partc...)' dataset. The 'Year' table is selected, and a context menu is open over it. The menu options include 'Duplicate', 'Rename', 'Hide', 'Create', 'Convert to Continuous' (which is highlighted), 'Change Data Type', 'Default Properties', 'Group by', 'Folders', 'Hierarchy', 'Replace References...', and 'Describe...'. The main view shows a 'Bump Chart' visualization with a 'Drop field here' prompt.
