Dashboard Sahesini Genislendirmek - Size

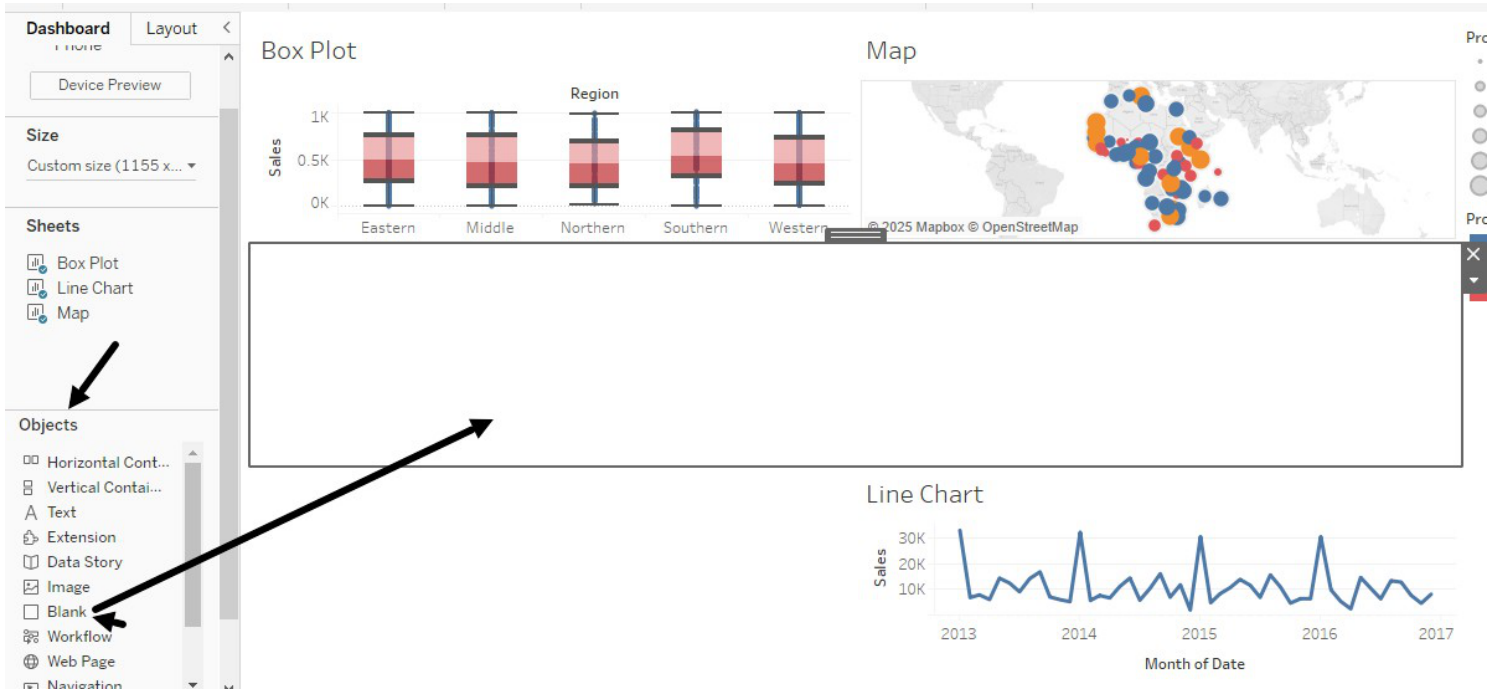

Dashboard-ı Clear etmek, Dublicate etmek, New WorkSheet yaratmaq

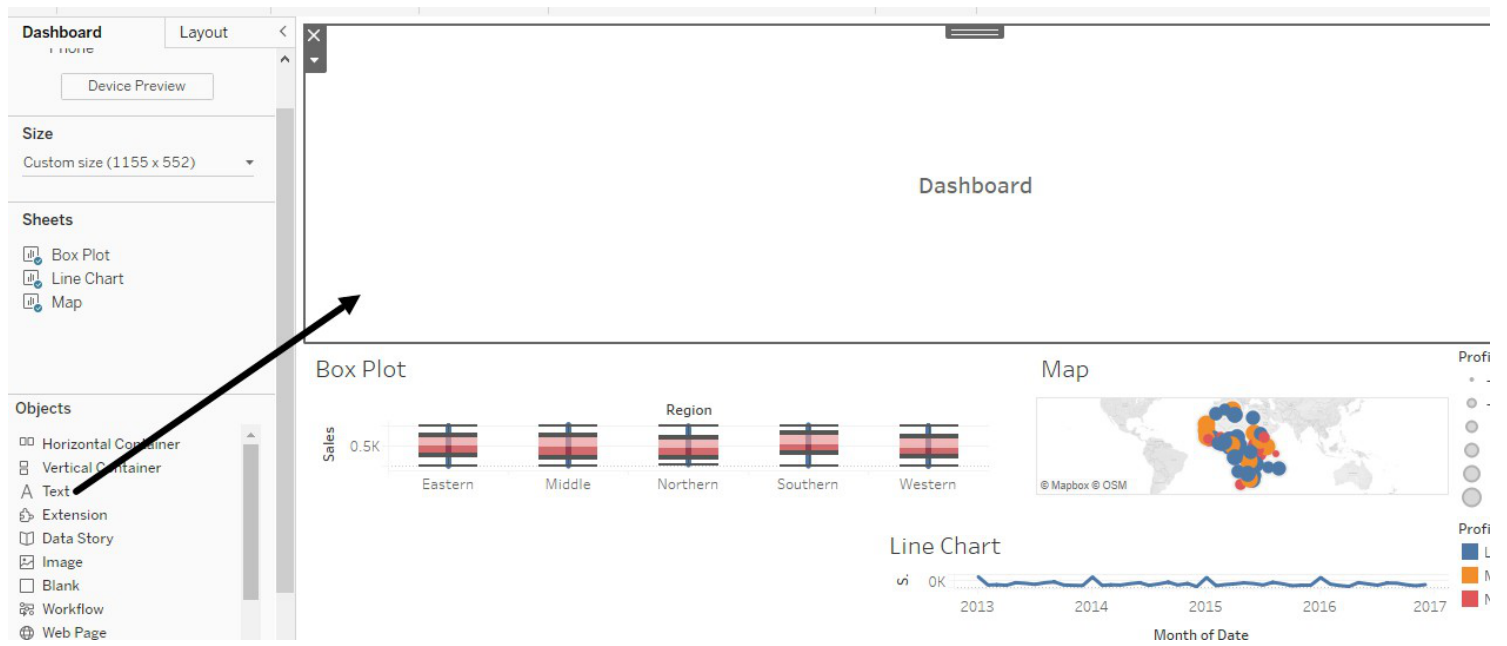

Boş Konteyner yerleşdirmek (Sonra Vizual atmaq üçün)

Objects - Blank - Vizualar Arası boşluqlar yaratmaq üçün

Objects - Text - Dashboard-a Text əlavə etmək

1) Vizualı Remove etmək, 2) Vizualın olduğu Sheet-ə getmək

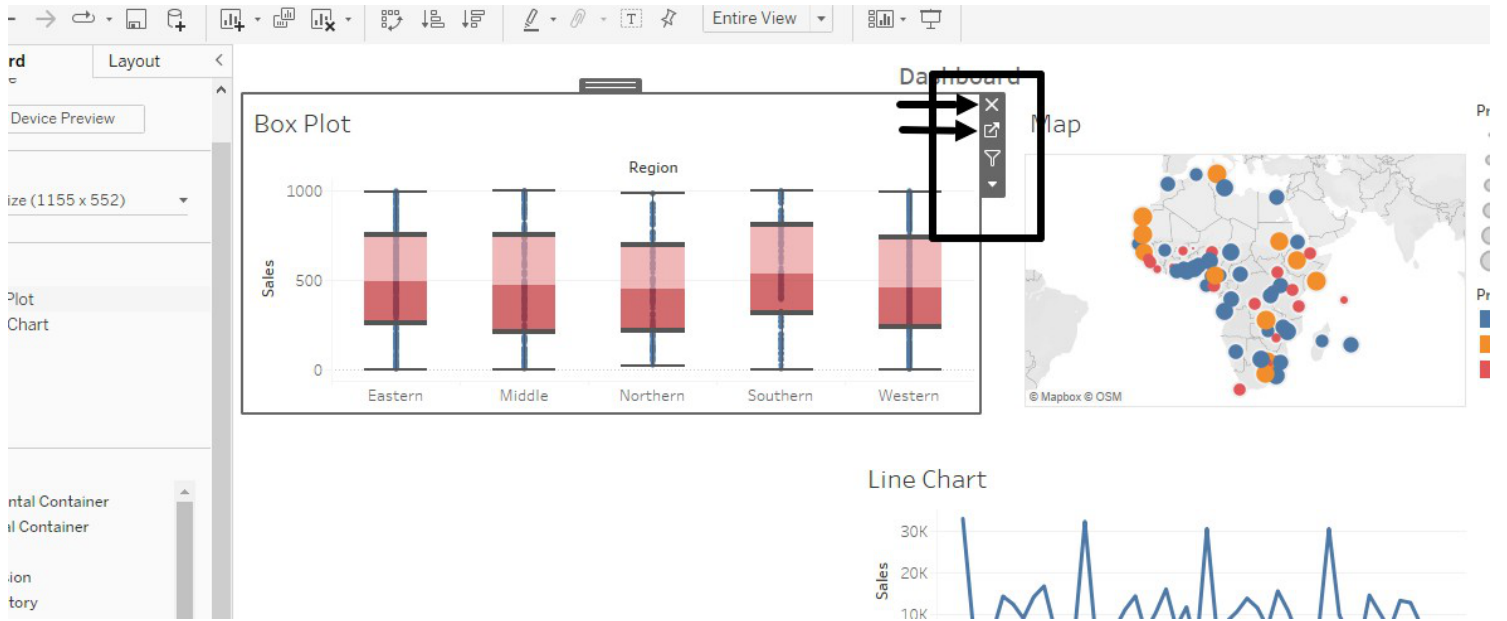

Chart Title və Caption (Rəy yazılır) Passiv və ya Aktiv etmək

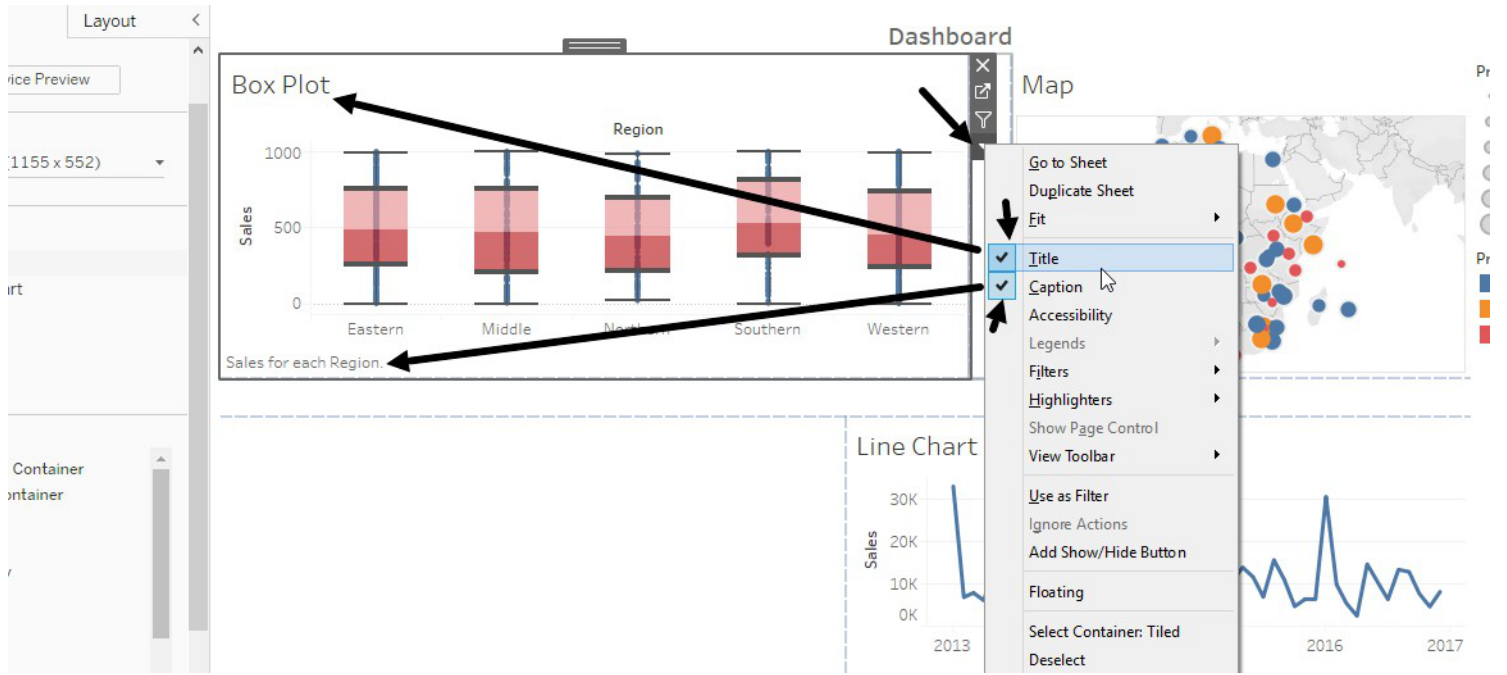

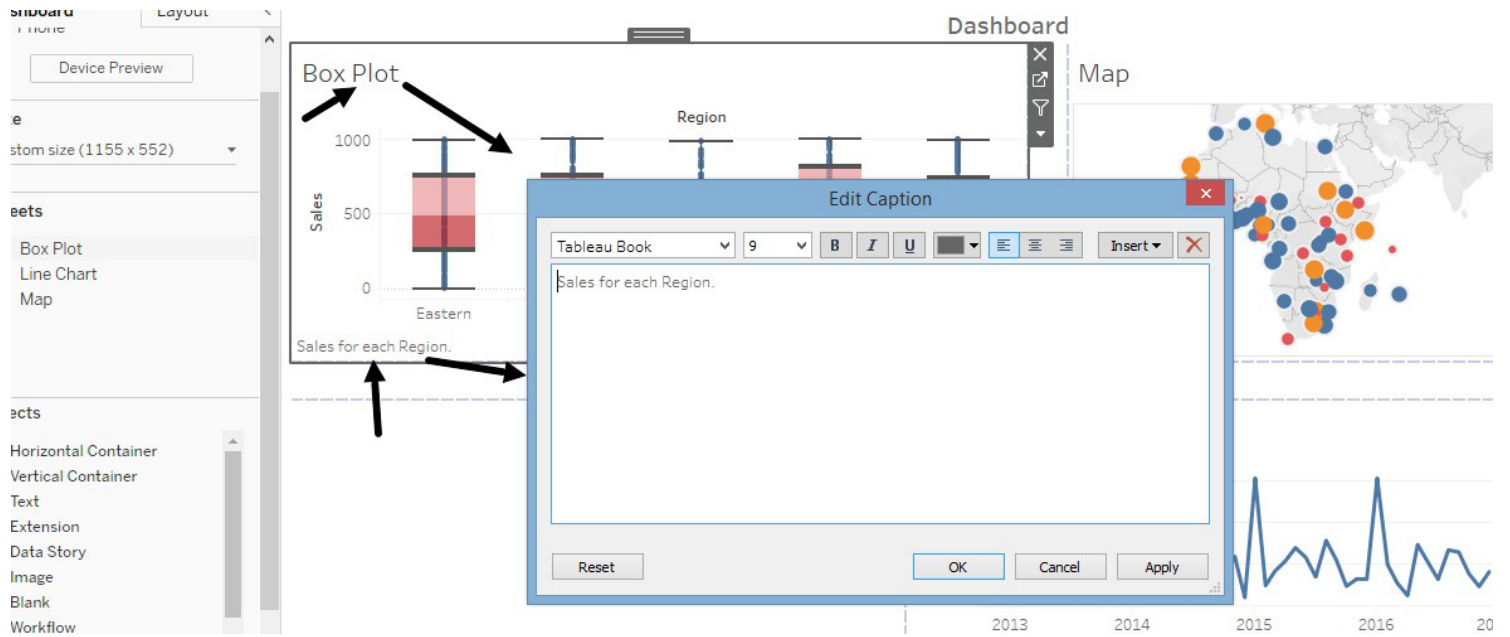

Chart Title və Caption-nı Edit etmək (Double Click ilə)

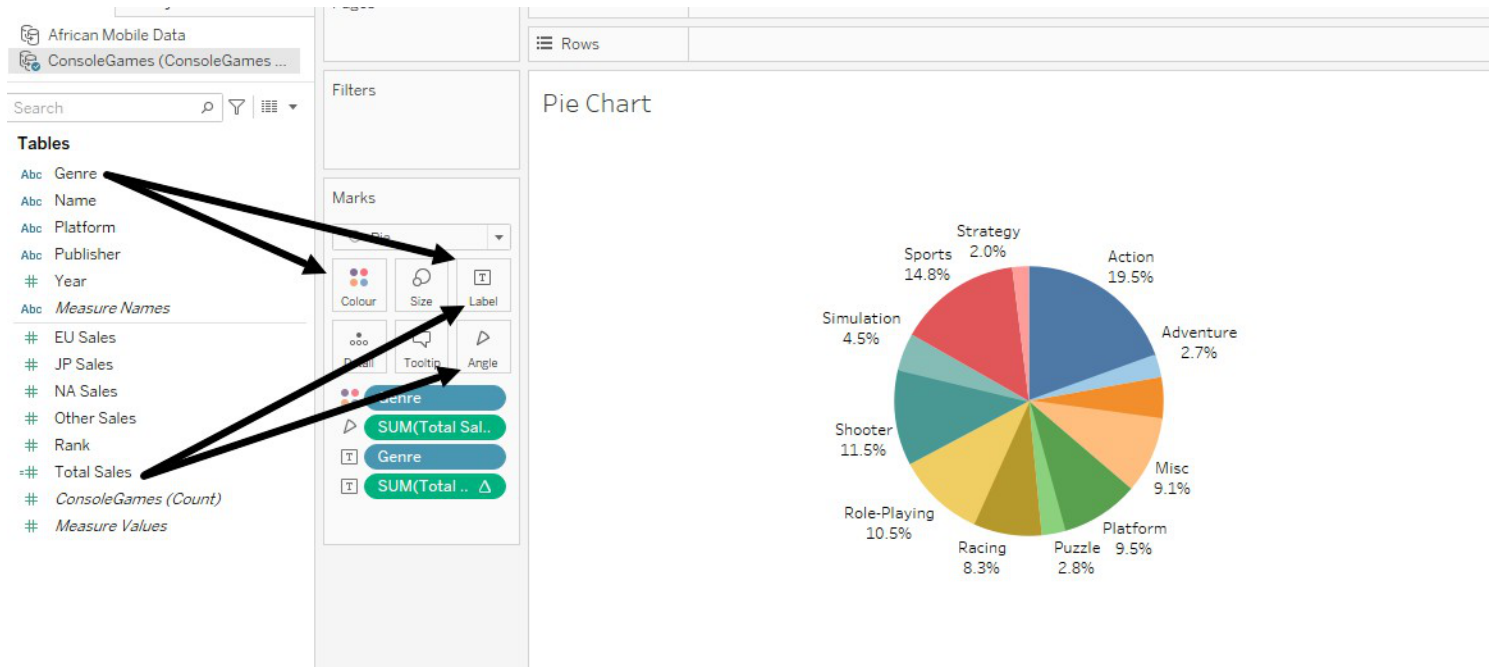

2-ci Dashboard üçün Vizualar qurmaq - Calculated

The screenshot shows the Tableau interface with the following components:

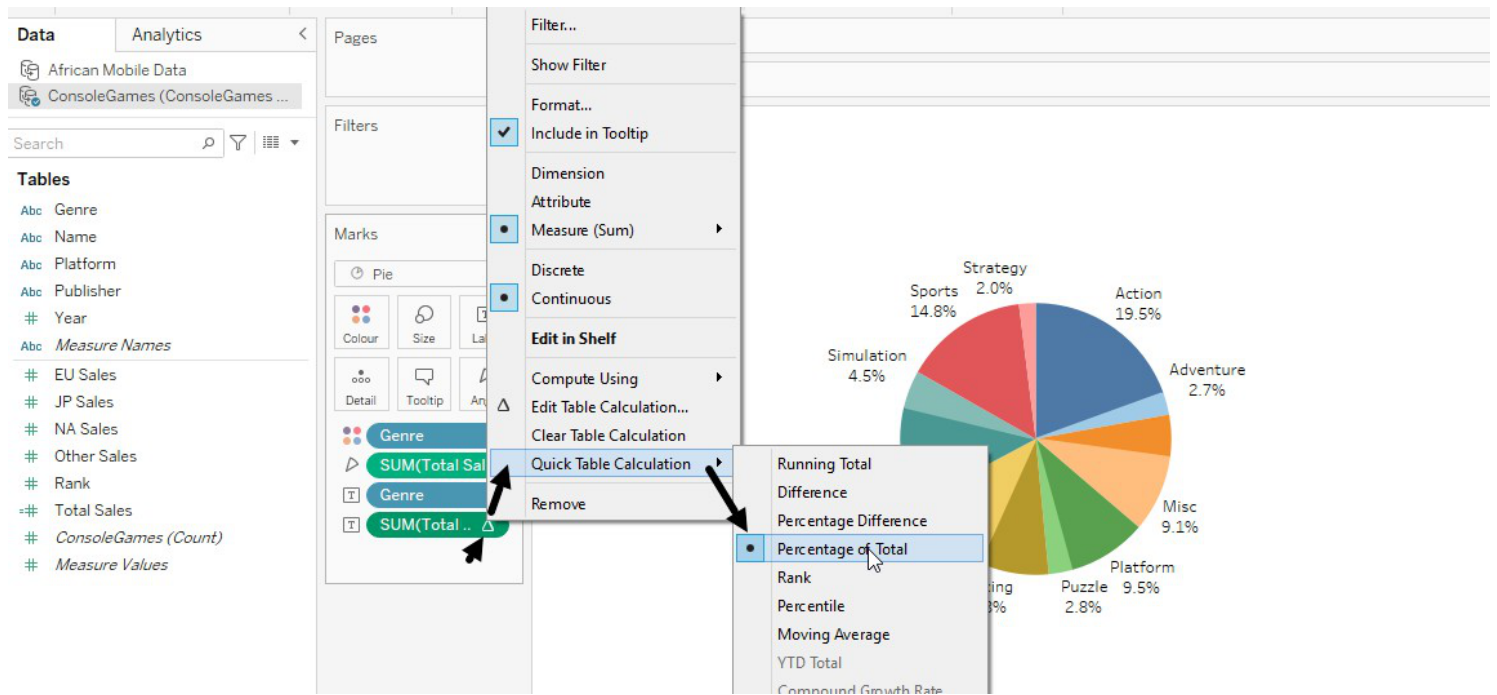

- Top Bar:** Data sources "African Mobile Data" and "ConsoleGames (ConsoleGames ...)" are listed. The "Rows" shelf is empty.
- Left Panel (Fields List):**
 - Tables:** Genre, Name, Platform, Publisher, Year, Measure Names.
 - Measures:** EU Sales, JP Sales, NA Sales, Other Sales, Rank, **Total Sales** (highlighted in green), ConsoleGames (Count), Measure Values.
- Filters:** Empty.
- Marks:** Set to "Automatic".
- Pie Chart View:** A modal window titled "Pie Chart" is open, showing the calculated field formula: $[EU\ Sales] + [JP\ Sales] + [NA\ Sales] + [Other\ Sales]$. The field name "Total Sales" is entered in the top left of the modal. The modal also shows "ConsoleGames (ConsoleGames (1) (1))" and a status message "The calculation is valid." with "Apply" and "OK" buttons.

Arrows indicate the workflow: from the "Total Sales" field in the Measures list to the calculated field formula in the Pie Chart modal, and from the "Apply" button back to the "Total Sales" field.
