

Create Calculated Field - Total Churn sütunu yaratmaq

The screenshot shows the Tableau interface with the 'Columns' shelf containing 'Gross_adds (1)'. The 'Rows' shelf is empty. The 'Marks' card is set to 'Automatic'. The 'Filters' shelf is empty. The 'Tables' pane on the left lists various fields, including 'Churn May', 'Churn June', 'Churn July', 'Data Apr', 'Data Feb', 'Data Mar', 'Ofnet Total minutes Apr', 'Ofnet Total minutes Feb', 'Ofnet Total minutes Mar', 'Onnet Total minutes Apr', 'Onnet Total minutes Feb', 'Onnet Total minutes Mar', 'Revenue Apr', 'Revenue Feb', 'Revenue Mar', and 'Total Churn'. The 'Total Churn' field is highlighted in green. A dialog box titled 'Total Churn' is open, showing the formula $[Churn May] + [Churn June] + [Churn July]$. The dialog box has an 'Apply' button and an 'OK' button. A message at the bottom of the dialog box states 'The calculation is valid'. Arrows indicate the flow of the process: from the 'Total Churn' field in the 'Tables' pane to the dialog box, and from the 'Apply' button back to the 'Total Churn' field.

Create Calculated Field - Churn Rate

The screenshot illustrates the process of creating a calculated field in Tableau. On the left, the 'Tables' pane lists various fields, including 'Churn Rate', 'Total Churn', and 'Gross_adds (1).sav (C...)'. The 'Churn Rate' field is highlighted in green. In the center, the 'Marks' card shows the 'Automatic' mark type. On the right, a dialog box titled 'Churn Rate' displays the formula:
$$\text{SUM}([\text{Total Churn}]) / \text{COUNT}([\text{Gross_adds (1).sav}])$$
. The dialog box also includes a confirmation message 'The calculation is valid.' and buttons for 'Apply' and 'OK'. Arrows indicate the flow of the process: from the 'Churn Rate' field in the 'Tables' pane to the 'Churn Rate' dialog box, and from the 'Gross_adds (1).sav (C...)' field to the formula in the dialog box.

Edit Label - Value-nın qabağına Söz yazmaq

The screenshot illustrates the process of editing a text label in Tableau. The main view shows a worksheet named 'Sheet 1' with a text mark 'Churn Rate' and a value '35.7%'. The 'Marks' card on the left shows the text mark is set to 'Automatic'. The 'Edit Label' dialog box is open, showing the text 'Churn Rate' and the value '<AGG(Churn Rate)>'. The dialog box has a 'Text' field with a dropdown menu showing '<AGG(Churn Rate)>' and an 'Alignment' dropdown set to 'Automatic'. The 'Apply' button is highlighted with a red arrow.

Churn Rate May

The screenshot shows the Tableau interface with the following components:

- Tables List:** A list of tables on the left, including "Churn July", "Churn June", "Churn May", "Churn Rate", "Churn Rate May" (highlighted in green), "Data Apr", "Data Feb", "Data Mar", "Ofnet Total minutes Apr", "Ofnet Total minutes Feb", "Ofnet Total minutes Mar", "Onnet Total minutes Apr", "Onnet Total minutes Feb", "Onnet Total minutes Mar", "Revenue Apr", "Revenue Feb", "Revenue Mar", "Total Churn", and "Gross_adds (1).sav (C...)".
- Marks Card:** Located in the center, it shows the "Automatic" mark type and a green pill labeled "AGG(Churn Ra..." (partially visible).
- Calculated Field Dialog:** A dialog box titled "Churn Rate May" is open, showing the formula:
$$\text{SUM}([Churn May]) / \text{COUNT}([Gross_adds (1).sav])$$
 The dialog also indicates "The calculation is valid." and "1 Dependency".
- Buttons:** "Apply" and "OK" buttons are visible at the bottom right of the dialog.

Arrows indicate the workflow: one arrow points from the "Churn Rate May" table in the Tables list to the "Churn Rate May" calculated field in the Marks card, and another arrow points from the "Churn Rate May" calculated field in the Marks card to the "Apply" button in the dialog box.

Churn Rate June

The screenshot shows the Tableau interface with a list of tables on the left, including 'Churn Rate June'. The 'Marks' card is set to 'Automatic'. A dialog box titled 'Churn Rate June' is open, displaying the following formula:

$$\text{SUM}([\text{Churn June}]) / \text{SUM}(\text{IF } [\text{Churn May}] = 0 \text{ THEN } 1 \text{ END})$$

The dialog box also shows 'The calculation is valid.' and '1 Dependency'. The 'Apply' button is highlighted. Arrows indicate the flow from the 'Churn Rate June' table in the list to the dialog box, and from the 'Apply' button to the 'Churn Rate June' table.

Churn Rate Jule

The screenshot displays the Qlik Sense interface with a table list on the left and a calculation editor on the right. The table list includes various metrics such as 'Churn July', 'Churn June', 'Churn May', 'Churn Rate', 'Churn Rate July', 'Churn Rate June', 'Churn Rate May', 'Data Apr', 'Data Feb', 'Data Mar', 'Ofnet Total minutes Apr', 'Ofnet Total minutes Feb', 'Ofnet Total minutes Mar', 'Onnet Total minutes Apr', 'Onnet Total minutes Feb', 'Onnet Total minutes Mar', 'Revenue Apr', 'Revenue Feb', 'Revenue Mar', and 'Total Churn'. The 'Churn Rate July' table is highlighted in green. The calculation editor shows the formula for 'Churn Rate Jule' as $\text{SUM}([\text{Churn July}]) / \text{SUM}(\text{IF } [\text{Churn May}] = 0 \text{ AND } [\text{Churn June}] = 0 \text{ THEN } 1 \text{ END})$. The calculation is valid, and the 'Apply' button is highlighted. The 'OK' button is also visible.

Edit Label with Tooltip Trips & Ticks - Copy edirik

The screenshot shows the Tableau interface with a chart titled "Chur Rate by Months". The chart displays three data points: 9.9%, 11.7%, and 19.1%. The "Edit Tooltip" dialog box is open, showing the following text:

Churn Rate May: <AGG(Churn Rate May)>
Churn Rate June: <AGG(Churn Rate June)>
Churn Rate Jule: <AGG(churn Rate Jule)>

The dialog box also includes options for "Show tooltips" (checked), "Include command buttons" (checked), and "Allow selection by category" (checked). The "Responsive - Show tooltips instantly" dropdown is set to "Responsive".

Arrows indicate the workflow: from the "Tables" list on the left, to the "Marks" card, then to the "Tooltip" tab, and finally to the "Edit Tooltip" dialog box.

Total Churn Dimension to Row və Measure Names to Filter

The screenshot illustrates the configuration of a Power BI report. In the left-hand pane, the 'Tables' list includes 'Gross Add Date', 'Tarif', 'Total Churn Dimension', and 'Measure Names'. The 'Measure Names' table is expanded, showing a list of measures such as 'Churn July', 'Churn June', 'Churn May', 'Churn Rate', 'Churn Rate Jule', 'Churn Rate June', 'Churn Rate May', 'Data Apr', 'Data Feb', 'Data Mar', 'Ofnet Total minutes Apr', 'Ofnet Total minutes Feb', 'Ofnet Total minutes Mar', 'Onnet Total minutes Apr', 'Onnet Total minutes Feb', and 'Onnet Total minutes Mar'. The 'Columns' shelf at the top contains 'Total Churn Dimensi..'. The 'Filter [Measure Names]' dialog box is open, displaying a list of measures with checkboxes. The measures 'Revenue Apr', 'Revenue Feb', and 'Revenue Mar' are checked. The 'All' button is selected. The 'Summary' section shows 'Field: [Measure Names]', 'Selection: Selected 3 of 21 values', 'Wildcard: All', 'Condition: None', and 'Limit: None'. Arrows indicate the flow of configuration: from the 'Measure Names' table to the dialog, from the 'Total Churn Dimension' column header to the 'Columns' shelf, and from the 'Revenue Apr', 'Revenue Feb', and 'Revenue Mar' measures to the 'All' button.
