Number of Survey - Create Calculated Field

The screenshot displays the Tableau interface for creating a calculated field. On the left, the 'Tables' pane lists several data sources: 'Questions', 'Survey Participants', and 'Survey results'. The 'Survey results' table is expanded, showing fields like 'Question Id', 'Rating', and 'SURVEY Participant ID'. A new calculated field, 'Number of Survey', is highlighted in green at the bottom of this list. In the center, the 'Marks' card is set to 'Automatic'. On the right, a dialog box titled 'Number of Survey' is open, showing the formula `COUNTD([SURVEY Participant ID])`. A message at the bottom of the dialog states 'The calculation is valid.' and '1 Dependency'. The 'Apply' button is highlighted, and the 'OK' button is also visible. Three black arrows indicate the workflow: one from the 'Number of Survey' field in the 'Tables' pane to the dialog box, another from the 'Filters' shelf to the dialog box, and a third from the 'Apply' button back to the 'Number of Survey' field in the 'Tables' pane.

Rating-i Convert To Dimension etmək

The screenshot shows a data tool interface with a 'Data' tab and an 'Analytics' tab. A search bar is at the top left. Below it, a 'Tables' list on the left contains several categories: 'Questions' (with 'Question' and 'Question Id1'), 'Survey Participants' (with 'Birth Date', 'Country', 'Gender', and 'SURVEY Participa...'), 'Survey results' (with 'Question Id' and 'SURVEY Participa...'), and 'Survey results' (with 'Measure Names'). The 'RATING' field is highlighted in green under the second 'Survey results' category. A context menu is open over the 'RATING' field, showing options: 'Add to Sheet', 'Duplicate', 'Rename', 'Hide', 'Create', 'Transform', 'Convert to Discrete', 'Convert to Dimension' (highlighted with a blue bar and a mouse cursor), 'Change Data Type', 'Default Properties', 'Geographic Role', 'Group by', 'Folders', 'Replace References...', and 'Describe...'. A black arrow points from the 'RATING' field to the 'Convert to Dimension' option. The background shows a 'Sheet 4' with columns and rows, and 'Drop field here' text.

Age - Create Calculated Field

The screenshot illustrates the process of creating a calculated field in Power BI. On the left, the 'Fields' pane shows a list of tables and measures. The 'Survey results' table is selected, and the 'Age' measure is highlighted in green. In the center, the 'Marks' card is set to 'Automatic'. On the right, a 'Histogram' chart is displayed. A dialog box titled 'Age' is open, showing the DAX formula: `DATEDIFF('year', [Birth Date], TODAY())`. The dialog box also includes a confirmation message 'The calculation is valid.' and buttons for 'Apply' and 'OK'. Arrows indicate the flow of the process: from the 'Fields' pane to the 'Marks' card, from the 'Marks' card to the 'Age' dialog box, and from the 'Age' dialog box to the 'Age' measure in the 'Fields' pane.

ISNULL - Create Calculated Field

The screenshot shows the Power BI Desktop interface. On the left, the 'Fields' pane displays a list of tables and columns. The 'Survey results' table is selected, and the 'ISNULL' calculated field is highlighted. A black arrow points from the 'ISNULL' field in the Fields pane to the 'ISNULL' calculated field in the main view. Another black arrow points from the 'ISNULL' calculated field in the main view to the 'Apply' button in the 'The calculation is valid.' dialog box.

Rating with Words - Create Calculated Field

The screenshot shows the Tableau interface with a data source named 'Survey results+ (Tourist s...'. The left sidebar displays a hierarchy of tables: 'Survey Participants' (with fields: Birth Date, Country, Gender, SURVEY Participant I...) and 'Survey results' (with fields: Question Id, RATING, SURVEY Participant ID, Age (bin), Isnull, and 'Rating with Words' which is highlighted). The main workspace is titled 'Rating Emoji' and contains a 'Marks' card with 'Shape' selected. A 'Rating with Words' dialog box is open, displaying a CASE statement:

```
CASE [RATING]
  WHEN 1 THEN 'Very Dissatisfied'
  WHEN 2 THEN 'Dissatisfied'
  WHEN 3 THEN 'Neutral'
  WHEN 4 THEN 'Satisfied'
  WHEN 5 THEN 'Very Satisfied'
END
```

At the bottom of the dialog, there is a status bar that says 'The calculation is valid.' and two buttons: 'Apply' and 'OK'. A black arrow points from the 'Rating with Words' field in the left sidebar to the dialog box. Another black arrow points from the 'Apply' button to the 'Rating with Words' field in the left sidebar.

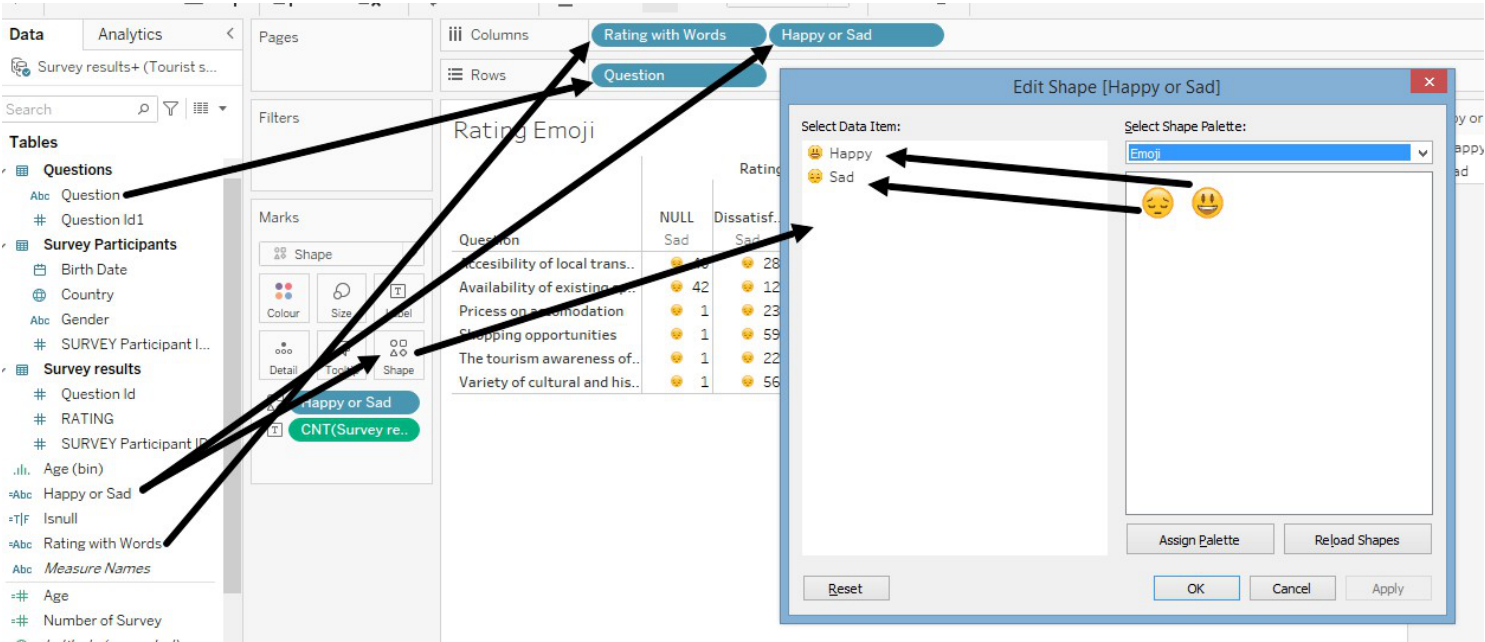

Happy or Sad - Create Calculated Field

The screenshot shows the Tableau interface with a data source named 'Survey results+ (Tourist s...'. The 'Tables' pane on the left lists several tables, including 'Survey results', which contains fields like 'Question Id', 'RATING', and 'SURVEY Participant ID'. The 'Happy or Sad' calculated field is highlighted in the list. The 'Rating Emoji' dialog box is open, displaying the following logic:

```
IF [RATING] > 3  
    THEN 'Happy'  
ELSE  
    'Sad'  
END
```

The dialog box also shows the field name 'Happy or Sad' and a confirmation message 'The calculation is valid.' with 'Apply' and 'OK' buttons. Arrows indicate the workflow: from the 'Happy or Sad' field in the list to the dialog box, and from the 'Apply' button back to the field in the list.

Emoji Chart

Rating with Words - Sort - Nested - Ascending

The screenshot shows a data visualization tool interface. On the left, there are panels for 'Questions', 'Survey Participants', and 'Survey results'. The 'Survey results' panel shows a table with columns for 'Question', 'Neutral Sad', 'Satisfied Happy', 'Very Dissatisfied Sad', and 'Very Satisfied Happy'. The 'Rating with Words' chart is selected, and a context menu is open over it. The 'Sort...' option is highlighted with a blue bar and a black arrow pointing to it. The chart displays a table of survey results with columns for 'Question', 'Neutral Sad', 'Satisfied Happy', 'Very Dissatisfied Sad', and 'Very Satisfied Happy'.

Nested - Ascending

The screenshot displays a data visualization tool interface. The main area shows a table titled "Rating Emoji" with columns for "Question" and "Rating with Words / Happy or Sad". The table contains data for various survey questions, including "Accessibility of local trans...", "Availability of existing sp...", "Prices on accommodation", "Shopping opportunities", "The tourism awareness of...", and "Variety of cultural and his...". The "Rating with Words / Happy or Sad" column is expanded, showing counts for "Very Dissatisfied", "Dissatisfied", "Neutral", "Satisfied", and "Very Satisfied".

A sorting menu is open, titled "Sort [Rating with Words]". The menu shows the following options:

- Sort By: Nested
- Sort Order: ☒ Ascending, ☐ Descending
- Field Name: Survey results
- Aggregation: Count
- Clear

Arrows indicate the selection of "Nested" for "Sort By" and "Ascending" for "Sort Order".
